Dear Ryan:

Thank you for your inquiry regarding M1by Bowen & Groves™. I have included information on both the company and the M1 software for your review.

M1 by B&G™ is an enterprise resource planning (ERP) software system designed for small to medium sized manufacturers. This includes job shops, custom and mixed-mode manufacturers and make to order manufacturers. M1 by B&G™ provides total integration and automation from quoting through invoicing and is capable of flexible and fully supported customization that ensures that you're most valuable and unique business processes can be handled with ease. Developed for Microsoft SQL Server and with a Microsoft Outlook, look and feel, M1 runs on Windows 98/NT 4/2000/ XP/2003. This makes the software easy to run and maintain making it the most cost effective solution. M1 with its unique smart screen technology and powerful integration tools is setting the standard in ERP software.

Our M1 software can offer significant business value and I am sure that you will find the enclosed information very interesting. To get a further look at our software we can schedule an internet demo or send you a 30 day trial copy of the software. Just let me know how you would like to proceed.

Yours sincerely
